WHAT IS CLAIMED IS:

A synthetic resin bag for grain or feed, comprising:
an inner layer made of polypropylene textile woven in gauze;

a coating layer attached to an inside surface of the inner layer by using polypropylene resin applied thereto, wherein the coating layer is made of high-density polyethylene film; and

an outer layer attached to an outside surface of the inner layer by using polypropylene resin applied thereto, wherein the outer layer is made of oriented polypropylene film mixed with non-slip material for raising coefficient of friction of the outer layer to 0.5 or more, and wherein the outer layer has a printed inside layer.
